There seems to be a problem. The IP address being recorded since June 21, 2017 is not mine. I consulted with an forensic IT analyst this morning and here is what was discovered:

That new IP is nowhere near my general IP location. My account is 50.141.156.15 and has been. The IP then changes to 73.247.63.232

That 73.247 Comcast tower is located in Algonquin East, Randall Road within a 5 mile (as the crow flies) radius. They didn't hack my PC or network or it would mask this other IP 73.247 address.

BTW, I stopped driving in November 2016 due to a disability. It looks like there was some activity here that should not be. I'm going to escalate to Ken with the State Central. Can you please follow whatever procedures are required in this instance and let me know what more I need to do?

Thank you.

Hi Kerri,

Here is the excel sheet from VB that I sent to you on Tuesday. Eaten in transit by computer gremlins, perhaps?

Here is the list of your logins for 2017. Enjoy. It gives you all the 2017 logins to date.

Kathy:

Forgive me for sending this to your gmail as I do not seem to have an official party email address for you.

I am writing to request a report of my VoteBuilder activity from June 2017 to present. I believe you have access to the full history of when I logged on, what I did once logged in and what reports, etc I may have compiled and/or exported to PDF.

I would like a copy of that report and that doesn't seem to be available under my level of access. My Login ID is kbarber-IL for ALG 48.

Thank you.
